Pavement troweling machine

Keywords: Pavement troweling machine,concrete polishing machine

Pavement troweling machine is also called concrete polishing machine used that construction surface is smoother and flatter, and the density and wear resistance of the surface can be greatly improved. This machine is the newest concrete surface coarse and fine trowel machines.

The features of pavement troweling machine

1. Widely used in concrete pavement, floors, docks, etc.
2. Height adjustable handle
3. Excellent water repellence
4. Safety switch,and durable chassis to prolong service life
4. The unique shock absorption handle allows the operator to control easily, makes the operator comfort and reduces fatigue.
5. Resistant to blushing and does not yellow, chip, peel, or flake with age or exposure, the centrifugal clutch ensures easy starts under no-load, can also adjust automatically and reduce maintenance.
6. The large control range of pitch (tilt of the blade and the ground), in the course of the operation, is completely applied to various conditions of smoothing and polishing.
7. Low center of gravity design and completely sealed belt protection devices, to provide clean and stable operation. Larger troweling machine is equipped with stable ring, which makes the operation more smoothly and reduces fatigue.
8. Rust protection on the heat treated ductile iron blade pitch controller and bee spider-shaped structure ensures the long-term durability.
9. Used for concrete to provide its service life, appearance, and reduce alkalinity efflorescence

Top components include concrete contractores, gearboxes, upper wear-plate, thrust collar assembly, bronze bushing, lower wear-plate, spider trowel arm bushings etc.

Clean up the machine, we can use warm, soapy water, must not use strong oxidizers and strong acids, don't use oil to pollute the concrete materials.

Pavement troweling machine main technical specifications

Type	DMR800	DMR900
Trowelling plate dia.(mm)	800	900
Rotate speed(r/min)	60-100	60-100
Trowelling blade qty.(pcs)	4	4
Gasoline engine power/Motor power(KW)	4/2.2	4/2.2
Weight(KG)	85	95
Demission(mm)	150×850×600	150×950×600
