## Container type concrete batch mix plant

**Keywords:** container type concrete batch mix plant,concrete batch mix plant

Container type concrete batch mix plant is new commercial concrete mixing device, can be divided into container type Vertical skip type concrete mixing plant and bucket concrete mixing plant. And this concrete plants output system working with trailer concrete pumps.

### Container type concrete batch mix plant structures and function

- ◆ Control house: operator control the container type concrete batching plant working
- ◆ Concrete mixer: mixing aggregate, cement, sand and water to produce concrete products
- ◆ Aggregate bins: storing and conveying materials
- ◆ Product or mix silos: storing concrete materials or conveying materials to concrete transport trucks
- ◆ Elevator: conveying mixture materials to product silos
- ◆ Feed bins or aggregate bins: charging raw materials
- ◆ Bag house dust filter: packing products and designed with recycling and dust filter to protect environments
- ◆ High performance belt cleaning system: cleaning the belt in time and improve the conveying efficiency
- ◆ Left / right blade fan mixer batching plant, long service life
- ◆ Tilting hopper technology, discharging materials without remain
- ◆ Installation and training direct from the factory

### **Container type concrete batch mix plant features**

- ◆ The concrete mixer manufacturer should install anti-pollution system to protect residential areas. Absence of suitable filter systems in cement silos can also be a major source of particulate matter pollution in the air.
- ◆ Comprehensive capacity range for container type concrete mixing plant is designed in accordance with customers' requirements or standards
- ◆ Which are specially designed for fitting into containing or storing quantity of concrete materials
- ◆ Provide good and flexible work condition
- ◆ Produced in a durable quality
- ◆ The center of the concrete batching plant is the concrete mixer, such as tilt drum mixer, planetary mixer, single shaft mixer, twin shaft mixer and pan mixer etc.
- ◆ Production rates up to 130cubic yards/ 100 cubic meters per hour according to mixing system
- ◆ Designed in Single or Split compartment
- ◆ Aggregate batcher is important parts to gain suitable proportion mixture material
- ◆ Mixer maintenance platform complete with expanded metal walkway,rails and toe boards
- ◆ Tilt mixer nose cone shroud, reduce waste materials

Container type concrete batch mix plant adopts twin shaft mixer which can ensure an even mixture of concrete and large output, while adopting tilt mixer which offers a consistent mix with much less maintenance labor and cost.

Compared to bucket type concrete batching plant and belt concrete mixing plants, this concrete plants also adopt PC and PLC control system working with computer and bench weighing machine etc. And mixer systems include mixer designs and capacities, plant control systems, low profile, aggregate bins and cement silos, weigh belts or weigh batchers etc.
