## **High-frequency quickly-fix external vibrators**

**Keywords: High-frequency quickly-fix external vibrators,concrete vibrator**

High-frequency quickly-fix external vibrators are one of concrete vibrator, which can be divided into GZF150 High-frequency quickly-fix external vibrators and DBP series high-frequency power complete equipment and designed similar to High-speed railway track board oscillator equipment.

### **High-frequency quickly-fix external vibrators application**

It is mainly used in the manufacture of the large concrete prefabricated components, such as the construction of the road, rail way, bridge, culvert concrete, especially the construction of T simply supported beam, I-beam and box-beam.

### **High-frequency quickly-fix external vibrators Features:**

1. It has the functions of preventing input phase short, input under-voltage, DC overvoltage, over current, over load and overheat by using electronic frequency conversion.
2. It can markedly reduce the damage of the formwork with the high frequency and low amplitude vibration. The small size, light weight, convenient assemble and disassemble make it especially usable on the large formwork.
3. Model: GZF150
4. Normally used with concrete rammer, concrete polishing machine, concrete mixers and other construction equipment.

**GZF150 High-frequency quickly-fix external vibrators Main parameters**

Type	Unit	GZF150
Exciting force	KV	12
Vibration freq.	HZ	150
amplitude	mm	0.8
Supply motor	Ph./HZ/V	3 /150 / 380
Power	Kw	1.5
Weight	Kg	19
Dimension	mm	ø150xL240
