Steel bar processing machine

Keywords: steel bar processing machine,Hydraulic cutting machine,steel bar bending machine

As one of leading construction equipment manufacturer in China, Dasion can produce steel bar processing machine,Hydraulic cutting machine,steel bar bending machine working with concrete or buildings. And the steel dimensions are designed in accordance with construction projects' requirements.

Steel bar processing machine

1.GW series Steel bar bending machine application

Steel bar bending machine model: GW40,GW50

GW40 is mainly used to bend the round steel with $\Phi 6$ - $\Phi 40$ in diameter and the screw-thread steel with $\Phi 6$ - $\Phi 36$ in diameter of the II class.

GW50 is mainly used to bend the round steel with $\Phi 6$ - $\Phi 50$ in diameter and the screw-thread steel with $\Phi 8$ - $\Phi 40$ in diameter of the II class.

2.Steel bar processing machine features

All the parts are strictly made according to the standard issued by the ministry. The gears are treated with high frequency quench, having the functions of high load moment, stable and reliable performance.

Steel bar processing machine main technical data

Model		GW40	GW50
Bending dia. Of the reinforcing steel, mm	Round steel	≤φ40	≤φ50
	Screw-thread steel of the II class	≤φ36	≤φ40
Workable dimension, mm		760*750	790*780
Dia. Of the operating disc, mm		350	420
Voltage, v		380	380
Speed of the main shaft, r/min		3.7-14	5-10
Overall size,mm		900*780*760	995*80*770
Weight,kg		450	670

Steel bar cutting machine

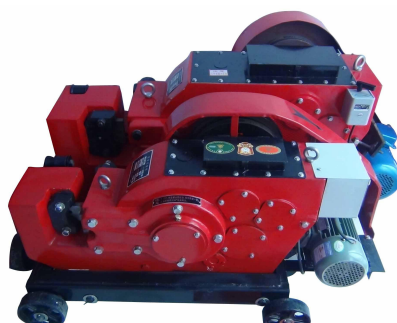

Steel bar cutting machine application

It is suitable for the cutting-off of the common carbon steel, screw-thread steel, hot-rolled round steel, square steel and flat steel in the construction project. Most concrete products used with this machine.

Steel bar cutting machine features

1. It has a reasonable design, small size, stable and reliable performance.
2. The closed gear transmission and splash lubrication are used, having a good lubrication.
3. The shaft ends are supported by the rolling bearings to reduce the power consumption.
4. The energy can be saved more than one third compared with the same product of its kind.

Steel bar cutting machine main technical specifications

Model	FGQ40	FGQ50
Dia.of the cut-off steel,mm	φ6-40	Φ14-50
Times of the continuous cutting-off, times/min	28	28
Power, KW	2.2	4
Voltage, v	380	380
revolution, r/min	2880	2890
Overall size,mm	1150*395*700	1550*550*800
Weight,kg	520	1080

Hydraulic straightening and cutting machine

Hydraulic straightening and cutting machine is an exclusive item for the screw-thread steel, which is sturdy and durable, combines the functions of straightening and cutting. This model is widely used in the bridges, roads, construction sites etc. More concrete materials with steel is produced concrete products used for construction projects with high strength performance. Concrete mixers are working with this machine.

Hydraulic straightening and cutting machine features

1. Models: YGT4-10,YGT4-12
2. Easy to operate, understand the numbers, that will be used
3. Electronic digital scale measurement, without mechanical ruler, which is more precisely with smaller error
4. Sturdy frame provides a longer service life. The extended foot pole, support the straightening and cutting of steel more than 10m
5. Multi-input length and the number of batches at the same time, computer stores memory, which is efficient and convenient
6. Smooth operation, low failure rate, easy maintenance
7. Adopt microcomputer control, straightens the steel (round/ screw-thread) automatically, and cuts off automatically (hydraulic cutting)

Hydraulic straightening and cutting machine technical parameters

Model	YGT4-10	YGT4-12
Dia.of the cut-off steel,mm	Round steel $\phi 4-\phi 10$ Screw-thread steel $\phi 4-\phi 8$	Round steel $\phi 4-\phi 12$ Screw-thread steel $\phi 4-\phi 10$
Length of the cut-off steel,m	0.5-99	0.5-99
Operating speed,m/min	31-45	31-45
Cut-off article number of each single batch	1-9999	1-9999
Power, KW	4	5.5
Power supply,V.Hz	Round steel 380 Screw-thread steel 50	Round steel 380 Screw-thread steel 50
Dimension,mm	1350*500*850	1350*500*850
Exact length error,mm	Round steel ± 8 Screw-thread steel ± 6	Round steel ± 8 Screw-thread steel ± 6
Total Weight,kg	220	220
